

Software Application Developer – Microsoft Access/SQL Server

Company: SJV Technology Group, LLC
Status: Full Time, Employee
Relevant Work Experience: 2 to 5 years
Education Level: Bachelor's Degree

Location: Fresno, CA 93721
Job Category: Computers, Software
Career Level: Experienced (Non-Manager)

SJV Tech is a leading provider of technology services to clients in the Central California region. Headquartered in Fresno, CA, SJV Tech and its predecessors have provided technology-based solutions since 1971. Technology services include custom software application development and network infrastructure services. SJV Tech deploys a broad range of technologies and serves a diverse clientele.

Job Description

SJV Tech has a full-time position open for a software application developer. This position is responsible for analyzing, designing, programming, debugging, testing, documenting, deploying, and maintaining application software for SJV Tech clients. The position involves maintaining existing software deployments as well as the development and deployment of new software. At times, the position will involve working with a team and at other times being the only resource on a project. Candidates must be self-starters and possess excellent time management skills as the position will require performing tasks for multiple projects and multiple clients. Direct client interaction and written project proposals are required so candidate must exhibit good verbal and written communication skills.

Requirements

- Relevant educational background
- 2+ years relevant software application development experience
- Must be able to work independently and as part of a team
- Must be able to handle the complexities of working on multiple projects simultaneously
- Good communication skills (verbal and written)
- Experience designing, deploying, and maintaining SQL Server databases
- Experience designing, deploying, and maintaining Microsoft Access databases
- Programming experience with Visual Basic for Applications (VBA)
- Fluent in both ADO and DAO data access programming
- Fluency in SQL

Desired Skills

- Object-oriented software design skills
- Crystal Reports
- C#, Visual Basic .NET
- Oracle
